

Findings from Trumbull County's Behavioral Health/Juvenile Justice (BHJJ) Initiative

21 youth have been enrolled since 2013

62% are male, 50% are nonwhite, & the average age is 15 years
At intake, common diagnoses include: Oppositional Defiant Disorder, Cannabis-related Disorders, and Depressive Disorders

91% of youth successfully completed treatment

Average length of stay in the program was 5 months

BHJJ led to a 58% reduction in risk for out of home placement

Treatment led to significant improvements in functioning & problem severity

95% of youth were NOT sent to an ODYS institution following services

Youth reported significant reductions in trauma symptoms and substance use

Problems with substance use decreased during treatment

Across Ohio, BHJJ costs about \$5,000 per youth compared to \$200,000 to commit a youth to ODYS

Grades improved & school suspensions/expulsions were greatly reduced
